

GOKULRAJ V

Full Stack Developer

✉ gokulrajvijayvp@gmail.com ☎ 9791293007 in linkedin.com/in/gokulvijayvp 📍 Coimbatore, Tamil Nadu

PROFESSIONAL SUMMARY

Full Stack .NET Developer with 3+ years of experience building enterprise web applications using ASP.NET Core, C#, React.js, TypeScript, PostgreSQL, and SQL Server. Experienced in REST API development, system integrations, workflow automation, Docker-based deployment, and AWS EC2 application deployment. Strong background in JavaScript development, requirement analysis, client collaboration, and production support.

TECHNICAL SKILLS

- Programming Languages:** C#, JavaScript, TypeScript, SQL
- Backend:** ASP.NET Core, .NET 8, Entity Framework Core, RESTful APIs, JWT Authentication
- Frontend:** React.js, HTML5, CSS3
- Databases:** PostgreSQL, SQL Server, MySQL
- Cloud & DevOps:** Docker, AWS (EC2), Microsoft Azure (Basic), Git
- Integrations:** Microsoft Teams, WhatsApp Business API, RFID
- Developer Tools:** Visual Studio, Visual Studio Code, Postman, Swagger, Claude Code, ChatGPT
- Development Practices:** SDLC, Agile Development, Requirement Gathering, UAT, Client Interaction, Code Review, Technical Documentation, Production Support

PROFESSIONAL EXPERIENCE

Full Stack Developer MachDatum – Coimbatore, Tamil Nadu	Jun 2024 – Present
- Built enterprise-grade web applications supporting manufacturing digitalization, quality compliance, maintenance management, and workflow automation across multiple business domains. - Architected scalable backend services and responsive user interfaces using ASP.NET Core, React.js, and TypeScript to improve business process efficiency - Converted customer requirements into configurable software solutions by collaborating with business stakeholders throughout the Software Development Life Cycle. - Established role-based access control, approval workflows, dashboard reporting, and business validation modules to streamline day-to-day operations. - Integrated Microsoft Teams and WhatsApp Business messaging to automate notifications, approval alerts, and maintenance updates across enterprise workflows. - Applied Docker-based containerization and deployed applications on AWS EC2 to support consistent and reliable application deployment. - Resolved production issues and implemented customer-requested enhancements across multiple enterprise applications. - Coordinated application deployments, production releases, user acceptance testing, and post-deployment technical support. - Guided junior developers through code reviews, technical discussions, and development best practices while collaborating with cross-functional teams. - Implemented enterprise solutions across manufacturing digitalization, maintenance management, calibration compliance, quality documentation, and workflow automation for industrial customers.	

PROJECTS

Calibration Management System

Tech Stack: ASP.NET Core, C#, React.js, TypeScript, PostgreSQL, Docker

- Built a centralized calibration management platform covering gauge lifecycle, scheduling, audits, issue tracking, and compliance reporting.
- Configured approval workflows, KPI dashboards, and automated reporting to improve operational visibility and audit readiness.
- Organized calibration history, issue management, and traceability through standardized business processes.
- Worked closely with stakeholders to deliver configurable features aligned with manufacturing quality requirements.

Computerized Maintenance Management System (CMMS)

Tech Stack: ASP.NET Core, C#, React.js, TypeScript, PostgreSQL, Docker

- Developed maintenance management modules for preventive maintenance scheduling, work order tracking, and equipment monitoring.
- Integrated Microsoft Teams notifications to deliver real-time maintenance alerts, approval requests, and operational updates.
- Connected WhatsApp Business messaging to automate technician notifications, maintenance reminders, and workflow communication.
- Enhanced collaboration by reducing manual follow-ups through automated enterprise communication.

Valve Assembly Digitalization

Tech Stack: ASP.NET Core, C#, React.js, TypeScript, PostgreSQL, Docker

- Created a manufacturing digitalization platform managing material receipt, production routing, assembly tracking, and testing workflows.
- Organized production traceability through centralized workflow management and configurable business processes.
- Simplified manufacturing operations by replacing manual activities with digital approval and tracking mechanisms.
- Delivered reporting modules that improved visibility into production progress and operational performance.

KEY ACHIEVEMENTS

- Successfully built and delivered 6 enterprise web applications supporting manufacturing digitalization, maintenance management, and quality compliance.
- Integrated Microsoft Teams and WhatsApp Business messaging to automate enterprise notifications and workflow communication.
- Collaborated directly with customers throughout requirement gathering, UAT, deployment, production support, and application enhancements.
- Mentored junior developers through code reviews, technical discussions, and development best practices.

EDUCATION

Bachelor of Science in Software Systems

Kongu Engineering College – Erode, Tamil Nadu

Jul 2019 – Jun 2022 | CGPA: 7.32
